SITE MANAGER

"Right people. Right equipment. Right on time."

PROBLEM:

- Construction companies need a digital dashboard to track projects, employees, and equipment in one place
- Current systems lack real-time visibility, causing inefficiencies, delays, and scheduling conflicts.

SOLUTION:

- SiteManager provides a live map linking projects to employees, equipment, and materials for real-time visibility.
- It helps managers make data-driven decisions, reduce downtime, and keep projects on track.

KEY FEATURES:

- Live Map showing project locations,
- Tracks heavy equipment and their maintenance records.
- Manages projects by assigning employees, equipment, and materials
